

Temus[▪]

Factsheet

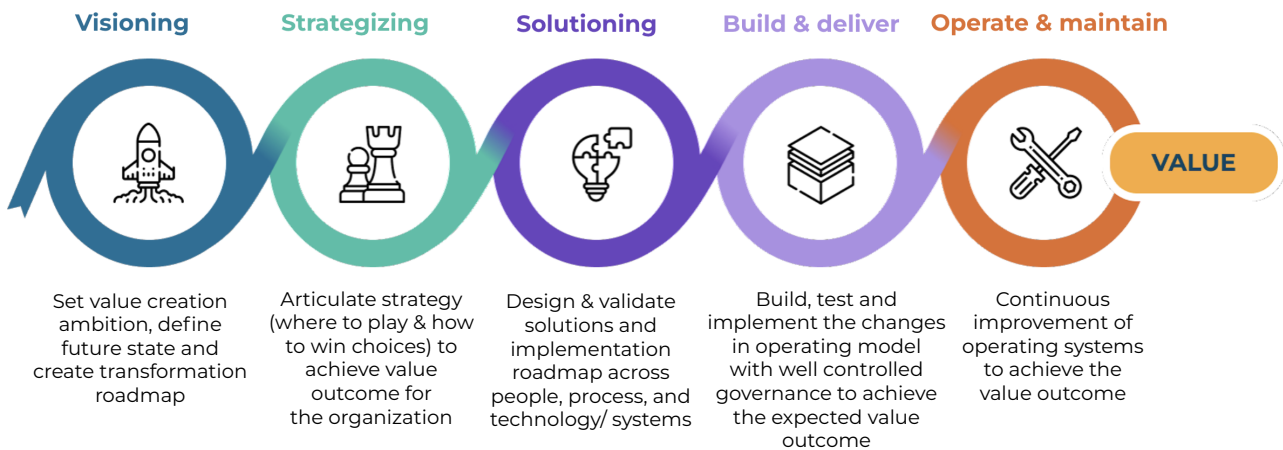

Our Purpose

Unlocking economic and societal value through holistic transformation enabled by technology.

Accelerating Digital Transformation for Singapore and beyond

Temus was established in April 2021 by Temasek in partnership with UST, to accelerate the digital transformation of leading enterprises and public sector agencies in Singapore and beyond. We catalyse digital transformation capabilities in a holistic manner, powered by a deep understanding of people and processes, to unlock social and economic value, and accelerate the present into the future.

Our unique approach is defined by value centricity, a long-term partnership mindset, and our end-to-end capabilities and ownership. It is a blueprint that starts with the articulation of the vision, to the delivery of the value, with speed, agility, and simplicity.

Growing Talents, Building Capabilities, Transforming Digital Futures:

Temus has attracted a strong bench of experienced talents in strategy, design, architecture, technology, data & artificial intelligence. Our foundation remains anchored to a strong Singapore Core, as we aspire to multiply local digital talent, and grow in tandem with Singapore's Smart Nation vision.

Temus.

Factsheet

In tandem with the growth of Singapore's digital footprint, Temus aims to expand its 200-strong workforce by five-fold over the next few years. Temus counts some of Singapore's most future-forward government agencies and large enterprises as its customers.

Financial services
and insurance

Healthcare

Education

Consumer
Goods

Telecommunications

Infrastructure

Energy and waste
management

KC Yeoh | Chief Executive Officer, Temus

"Temus' growth momentum is a testament to our unique proposition of forging long-term partnerships with our customers while keeping 'value creation' at the heart of helping to shape their digital futures.

We will build on this promising start to accelerate the growth of Singapore's digital talent pool and build distinct digital capabilities for our customers - in tandem with the country's Smart Nation aspirations."

Srijay Ghosh | Founding Member and Chief Revenue Officer, Temus

"Temus was born into a generation-defining crisis, at a time when organisations accelerated their investments in digital to thrive. Experts predict that by the end of this year, more than half the global economy will be powered by digital.

Imagine what these digital transformations can do to uplift lives, raise productivity, and grow the economy. Temus was founded for these reasons and more. We remain committed to unlocking economic and societal value through holistic transformation."
